

HIBAR Research:

What it is, why more of it is need,
and how this might be accomplished.

Lorne Whitehead, University of British Columbia

APRU Provosts' Forum 2018 - Session 2

11:00AM, Monday 12 March 2018

Highly
Integrative
Basic
And
Responsive
Research

Projects seeking *both* :

deep new knowledge *and* new practical solutions

By using *both* :

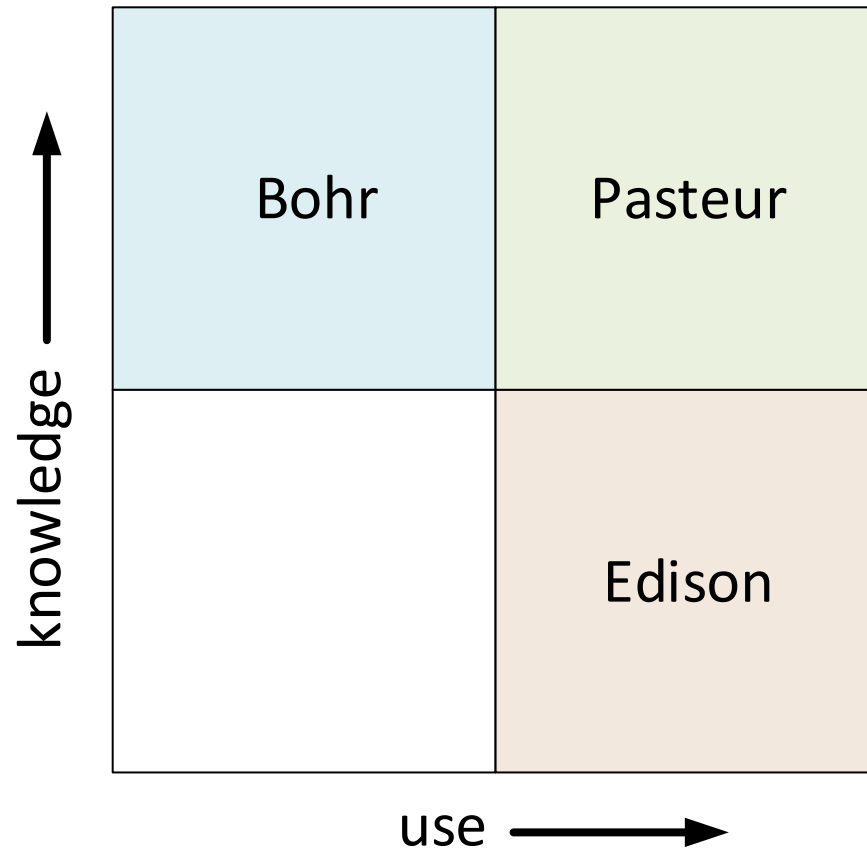

academic research methods *and* practical design thinking

And led, from the start and throughout, by *both* :

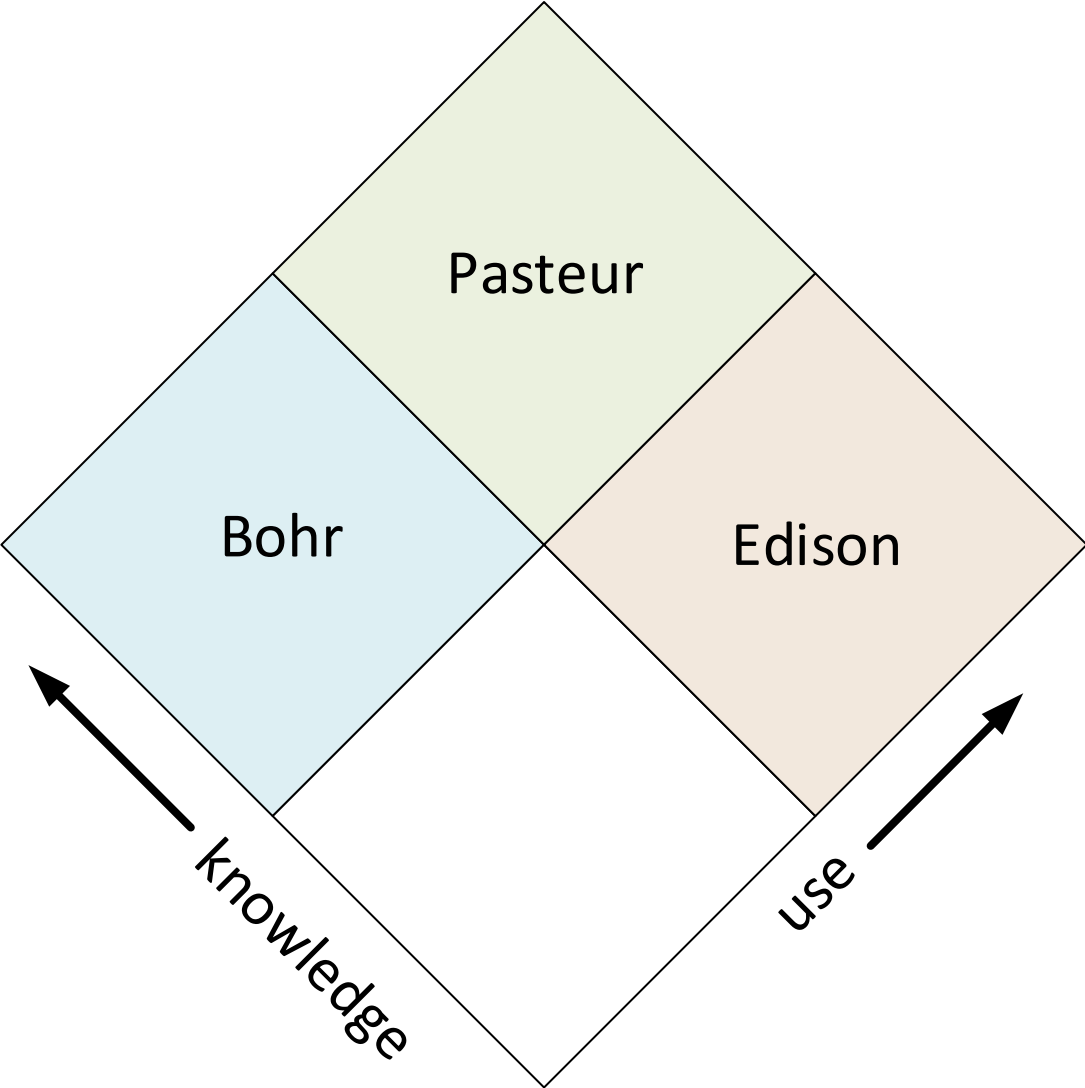

respected academics *and* real-world experts

“Engaging Theory with Practice for Transformative Solutions”

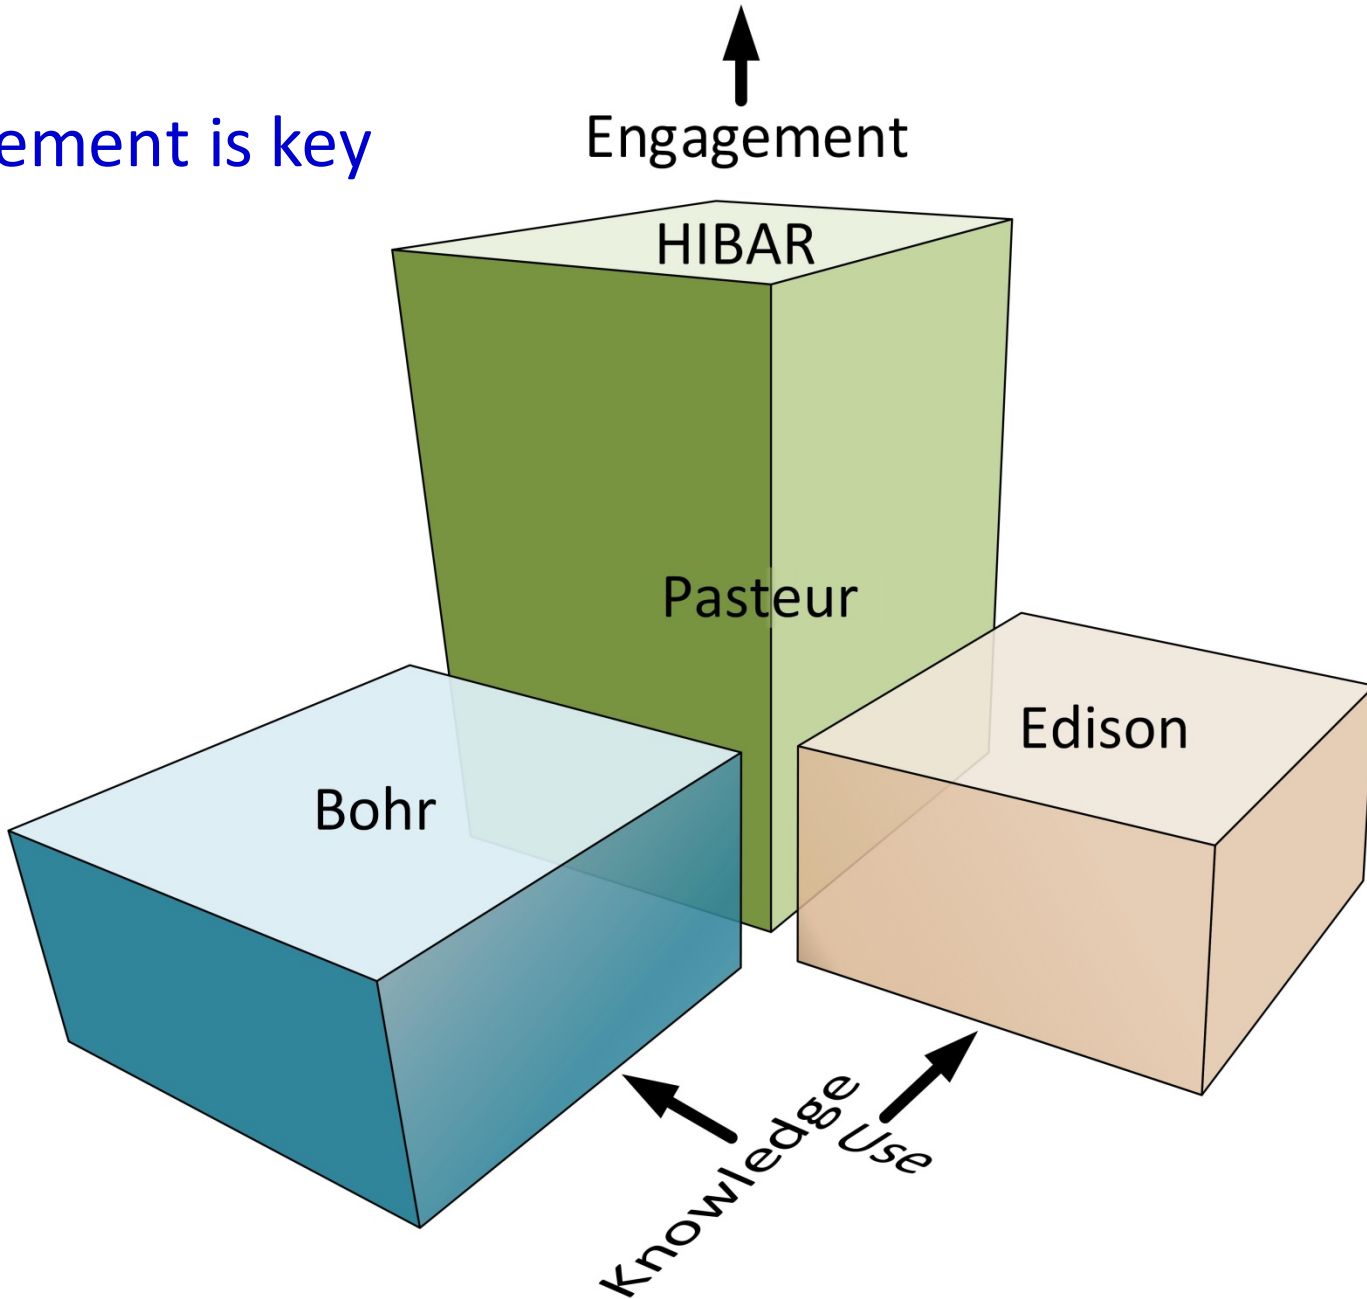

Background thinking – Donald Stokes “Pasteur’s Quadrant”

Reframing more equitably

Engagement is key
